

Watermelon & Cucumber

Our three-part featured treatment for Summer offers a uniquely therapeutic combination to benefit your skin.

SOOTHING BODY MASK

Watermelon is naturally high in antioxidants and its natural acids act as an exfoliant and astringent, helping cleanse and tighten the skin.

REFRESHING TONER

Our watermelon-cucumber toner helps refresh the skin and bring moisture back into the face and body.

MOISTURIZER

Our handmade lotion of watermelon juice, milk and mineral water is a rejuvenating final act.

A large, triangular slice of watermelon with a thick green rind and bright red flesh is positioned on the left side of the image. In the foreground, a white ceramic bowl is filled with several thin, round slices of cucumber, showing their characteristic green skin and light green interior with seeds. A few large, vibrant green leaves are scattered around the bowl and watermelon slice.

Body Mask, Toner,
Moisturizer
